Appzzon's proprietary smart education management systems, virtual academic learning systems, digital archiving systems, document management systems, anti-fraud digital document certification solution and more, have redefined their clients' information systems, supply chain, human resource practices and operations.
BEEHIVE

(Enterprise Content Management Software)

Beehive is an Enterprise Content Management Software, often referred to as Document Management Systems (DMS). A Document Management Software is a computer program used to store, manage and track electronic documents and electronic images of paper based information captured through the use of a document scanner. Beehive is a management solution that allows businesses to control the production, storage, management and distribution of electronic documents, yielding greater effectiveness and the ability to reuse information and to control the flow of the documents. Beehive is a document management software that integrates all essential document management, collaboration and an advanced search functionality into one easy to use solution. The system also includes administration tools to define the roles of various users, access control, user quota, level of document security, detailed logs of activity and automation setup.

BUSINESS BENEFITS

Having a robust document management system is fundamental to business, providing a process for making sure that controlled documents can be accurate, complete and up-to-date. But an organizational shift is needed from managing documents as a bureaucratic necessity to managing documents in order to strengthen the foundation of your business.

- Make controlled documents easier to find.
- Lower the costs of storing, using and disposing of documents.
- Notify users of documents they need to sign off on and have ownership of.
- Comply with the requirements of regulations and standards.
- Be audit ready and easily demonstrate document processes and staff competence.
- Spend less time, effort and cost scheduling training in response to changes to controlled documents.
- Show controlled document changes and ensure they are accurate, complete and up-to-date.
- Distribute revisions with a single click and ensure latest versions are being used.

KEY FEATURES OF BEEHIVE

Control your enterprise content: Having a robust document management system is fundamental to business, providing a process for making sure that controlled documents can be accurate, complete and up-to-date.

Multiple digital source: Collect information from any digital source.

Collaboration: Collaborate with colleagues on documents and projects
